 +91-8299823681

Lucknow, Uttar Pradesh, India

Profile

CSE undergraduate (GPA: 8.56) with hands-on experience in **developing robust systems, cloud infrastructure, distributed systems**, and backend development. Familiar with **Node.js, PostgreSQL, GraphQL, AWS, Docker, Kubernetes**, Redis, and Kafka, with foundational knowledge of **monitoring, observability, and SDE practices**. Interested in problem-solving, developing incident response systems and writing clean, maintainable and testable code.

Skills

Backend: Node.js, Express.js, FastAPI, WebSockets, REST APIs, PostgreSQL, MongoDB

Frontend: React.js, HTML5, TailwindCSS, Bootstrap

Languages & Scripting: Python, Bash, Java, JavaScript, C

Cloud & Infrastructure: AWS (EC2, S3, **CloudWatch**), Docker, Kubernetes, Linux, Git

Distributed Systems: Kafka (Pub/Sub), Redis (Queues), Microservices, System Design

Security: Cybersecurity Fundamentals, JWT Authentication, Secure API Design

Experience

Cloud Infrastructure & Backend Development (Freelance / Collaboration)

- Deployed a full-stack food delivery platform on **AWS**; reduced infrastructure costs by **70%** through cloud resource optimization and **Docker**-based deployment across **3+** services.
- Monitored resource usage and identified performance bottlenecks, improving deployment efficiency and maintaining service availability.

Projects

Leetcode Submission System – Distributed Microservices Architecture

 [GitHub](#)

- Built a **4-service distributed system** using an API server, **Redis** queue, **Kafka** pub/sub, and worker nodes; containerized services using Docker.
- Deployed using **Docker Compose** and tested on **Kubernetes**; monitored inter-service communication and analyzed queue throughput and worker performance bottlenecks.

tChat24 – Real-Time Chat System

 [Live Demo](#) —  [GitHub](#)

- Built a **SocketIO-based** real-time chat application supporting concurrent connections; reduced server load by approximately **40%** through client-side message filtering.

Blogify – Secure Cloud-Integrated Platform

 [Live Demo](#)

- Implemented **JWT-based authentication and authorization** with encrypted password handling.
- Integrated **AWS S3 SDK** for streaming uploads, avoiding disk and memory buffering for file storage operations.

Achievements

- Solved more than 100+ Leetcode problems with more than 2 approaches of each indicating strong problem-solving skills(DSA, Algorithm).
- Served as **School Captain** for a **500+ student** school, coordinating teams and events.
- Maintaining a **GPA of 8.56** alongside hands-on software and cloud-based projects.
